

1 Temporal Positioning

reason about event order

What action happened between taking something off the table and putting something on the table?

A. Drink from bottle

Evidence 20.60–21.35s: drink from bottle

2 Long-Horizon Sparse Evidence

link distant evidence across time

What action happened between using laptop and walking?

A. Get up

Evidence 7.81–16.80s: get up between laptop use and walking

3 Object-centric Action

identify object involved in an action

What container did the person pour from?

A. Bottle

Evidence 175.47–176.31s: pouring action involving a bottle

...

...

...

...

...

4 Concurrent Activity

detect simultaneous actions

What other action did the person perform while reading?

A. Drink from glass

Evidence 121.23–124.12s: reading overlaps with drinking from glass

5 State Transition

recognize physical state/posture

What is the person's posture at the end of the video?

A. Sitting

Evidence End of video: visible seated posture in the final frames
